WEATHER KEY POINTS

05/20/19 - 05/26/19

Monday-Sunday

- Windy conditions continue today and tomorrow across inland southern CA with gusts to 55 mph expected
 - The strongest winds are expected after daybreak on Tuesday and are expected to last through Tuesday evening before settling down after midnight.
- The active weather pattern continues especially across the northern half of the state
 - The northern coast will receive another 1-3" of rain over the next few days.
 - The debris flow threat on burn scars is very low. Debris flows are not likely.
- By the end of the week, weather systems moving through will bring snow to only the highest peaks of the Sierras as temperatures gradually warm.
